Wavefront Shaping for in vivo Brain Imaging

报告人：Na Ji

报告时间：2016年3月15日（星期二）下午3:00

报告地点：生物物理所9501会议室

主持人：徐涛研究员

报告人简介

Na Ji is a Group Leader at the Janelia Research Campus of Howard Hughes Medical Institute in Ashburn, Virginia. She studied chemistry and physics as an undergraduate in University of Science and Technology of China and later a graduate student at University of California Berkeley. Attracted to the problems of the brain, she moved to Janelia and worked with Eric Betzig on improving the resolution of in vivo brain imaging. She started her own group here in 2011, where, in addition to imaging technology development, her lab also apply the resulting techniques to outstanding problems in neurobiology.
